Lucidity, Consciousness & Care

Unexpected clarity near death opens a question.
It does not settle what happens afterwards.

INDEPENDENT EDITORIAL ANALYSIS · IONS CONNECTions LIVE CLIP

01 OBSERVATION

A Return of Connection

Witnesses describe renewed recognition, memory and meaningful communication before death.

02 EXPLANATION

Keep Alternatives Open

Residual brain function, temporary network changes and brain-independent accounts need discriminating tests.

03 MEANING

Honour the Experience

A farewell can matter deeply. Spiritual meaning and evidence of survival are separate questions.

Read the Numbers Carefully

Woollacott’s research brief summarises witness reports. These are separate findings.

62% Occurred within 24 hours of death

57% Lasted ten minutes or less

Not a combined percentage, a population prevalence estimate or a probability of survival. Underlying adult-survey methods and denominators were not independently checked here.

The AkashicOMNI Reading

DISCERN	Separate the observation, its explanation and its meaning.
DEEPEN	Compare alternatives, missing evidence and cultural context.
SYNTHESISE	Care now. Preserve uncertainty. Define what would change the conclusion.

HIERATIC016 · DEATH, GRIEF & IMPERMANENCE

Dignity, listening and opportunities for connection.

HIERATIC017 · REINCARNATION & CONTINUITY

Personal memory, mental continuity and timeless awareness remain distinct.
