

A Catalyst for Creating a Heavenly Paradise on Pachamama

Many Minds. Shared Care. Wisdom in Action.

AkashicFUTURES Lab

A Catalyst for a Flourishing Pachamama

Many Minds. Shared Care. Wisdom in Action.

A shared direction

AkashicFUTURES Lab is a developing proposal connecting evidence, imagination and compassionate action. We ask how different minds might help reduce suffering and create conditions in which all beings can flourish.

The invitation welcomes neurodivergent and neurotypical perspectives, different experiences and support needs. Self-compassion, rest and healthy boundaries belong within service.

Aspirational concept, not an existing research facility or a prediction. AI-assisted artwork. Pachamama is used with respect for its Andean cultural origins.

Different questions. Shared responsibility.

AkashicPRISM

Evaluate sources, evidence and perspectives. Existing foundation.

AkashicDARK

Explore subtle experience and uncertain explanations. Proposed framework.

AkashicAWARE

Connect attention, ego, compassion and everyday integration. New concept.

AkashicOMNI

Explore self, consciousness and a potentially greater whole. Philosophical hypothesis.

Six branches proposed for discussion

SELF / Identity, ego and perspective

RELATE / Listening, consent and relationships

RHYTHM / Rest, creativity and sustainable routines

MEANING / Dreams, symbols and interpretation

COMMONS / Attribution, stewardship and shared care

BECOMING / Habits, change and integration over time

SELF, RELATE and RHYTHM could become AWARE modules. The others could begin as connected exploration streams. Names and relationships remain provisional.

Building on AWAKEN, HIERATIC, HOMESENSE, TRANSCEND and ADAPT. AkashicAWARE is separate from the AWARE cardiac-arrest studies.
